

RE\_IMAGINE YOUR FUTURE

## Azure Infrastructure Engineer

Munich Re Automation Solutions is looking for passionate & dedicated people like you.

Part of Munich Re, one of the largest reinsurers in the world, Munich Re Automation Solutions provides new business processing and underwriting automation solutions to the life insurance industry. Headquartered in Dublin, the Automation Solutions division also has offices in Sydney, Tokyo, Singapore and Chicago.

Working with forward-thinking customers across the globe, our mission is to revolutionise the way life insurance is bought and sold, using next-generation technology to give insurers the power to grow their businesses profitably.

### Key Responsibilities:

- Set up, configure and train Azure based IT Services (Security, B2B2C User Management Workflow, Rules Engine)
- Setting up and establishing the IT Operations Processes (Service Desk, Monitoring, Incident Management, SIEM, Deployment, Test Automation, ...)

### Education

- BA/BS in Product Management, Computer Science, Engineering or Business.

### Critical Experience

- At least 3 years Azure experience.
- Excellent knowledge and practical experience of the Azure platform, especially in the areas of User Management & Security
- Good knowledge of the technology stack used:
  - Azure
  - VSTS
  - PowerShell
  - IIS
  - CosmosDB
  - Active Directory
  - Storage Account
  - Key Vault
  - Application Insights
  - Slot Deployment
  - Sharepoint Graph API
- Conceptual knowledge about microservice architecture
- Set up and configure Azure components
- Design and implement B2B (2C) platforms based on MS Azure
