

RE\_IMAGINE YOUR FUTURE

## Product Owner, with Underwriter Experience

Munich Re Automation Solutions is looking for passionate & dedicated people like you.

Part of Munich Re, one of the largest reinsurers in the world, Munich Re Automation Solutions provides new business processing and underwriting automation solutions to the life insurance industry. Headquartered in Dublin, the Automation Solutions division also has offices in Sydney, Tokyo, Singapore and Chicago.

Working with forward-thinking customers across the globe, our mission is to revolutionise the way life insurance is bought and sold, using next-generation technology to give insurers the power to grow their businesses profitably.

### Role Purpose:

The MDS Product Owner champions digitisation of the underwriting process and is a crucial role, drawing on your underwriting experience to help identify business user needs/problems and selecting which problems to solve. You will work with a team of designers and engineers to translate these unmet needs into a backlog of software features.

You will own the feature roadmap to track the development and releases of features, manage the backlog through planning, coordination, communication, facilitation and take responsibility to deliver quality software product releases providing maximum business value.

Because of you and your team's work, you will enable Life Insurance companies to succeed in a new digital age and help more people around the world to get Life Insurance faster.

### Key Responsibilities:

- Work hand-in-hand with the Product Managers and other members of the product management team and be responsible for guiding the implementation of product features and the product roadmap.
- Gain an in-depth level of understanding of the business domain and products.
- Talk to customers and internal stakeholders around the world to discover customer problems and identify requirements to meet their needs.
- Be the voice of the customer and work with design and engineering teams across all phases of product development: ideation, design, development, product rollout and product evaluation.
- Create, maintain and prioritise a backlog of clear and concise user stories.
- Work in an Agile development team, planning iterations and releases to meet business objectives while effectively managing risk and scope.
- Coordinate the launch of new product releases.
- Use data to make decisions - define KPIs, set goals, milestones, and benchmarks. Gather data, synthesise into themes, analyse to steer product direction.

## Education

BA/BS in Product Management, Computer Science, Engineering or Business.

## Critical Experience

- Experience as an underwriter or in the life insurance industry (3+ years)
- Experience of Agile software development frameworks, back-end services and delivery of web-based solutions would be beneficial.

## Technical / Professional Skills

- Be professional and reliable with outstanding communication, presentation and leadership skills.
- Excellent organizational and time management skills.
- Sharp analytical and problem-solving skills.
- Creative thinker with a vision.
- Attention to detail.
- Customer & quality focused.
- Experience with a vendor to the life insurance industry would be of benefit.
- Previous Product Owner and Agile Development experience would be of benefit.
- For the right candidate product owner training and certification will be provided.
