

RE_IMAGINE YOUR FUTURE
Programme Manager

Munich Re is one of the world's largest reinsurers providing solutions for complex risks to 40 million clients in over 30 countries.

Munich Re Automation Solutions are the market leader in providing new business processing and underwriting automation solutions to the life insurance industry. The Automation Solutions division of Munich Re delivers exceptional solution-based expertise that enables straight through processing (STP), increases sales and reduces costs for life insurers worldwide.

Munich Re Automation Solutions have enabled STP and "instant issue" for insurers and banks globally, who are now able to auto-assess the majority of new applications at the point of sale for a variety of life insurance products across the full spectrum of distribution channels. This has been accompanied by a significant reduction in new business acquisition costs.

Headquartered in Dublin Ireland, the Automation Solutions division of Munich Re also has offices in Sydney, Tokyo, Singapore and Chicago.

About the role

Reporting to the CFO, we are looking to recruit a proactive, committed, innovative and organised professional with strong programme and project management experience and excellent communication skills to the position of Programme Manager.

This role will support the implementation of and provide a governance framework for the Munich Re Automation Solutions multi-year strategic R&D programme, the LEAN programme and other internal projects being executed throughout Munich Re Automation Solutions group.

What you will work on

- Strategic Programme Management and Governance, including project prioritisation in line with the company strategy and goals.
- Programme manage the strategic innovation and R&D programme and the LEAN initiative.
- Develop and implement best in class project management processes, standards, frameworks and tools.
- Support and train staff with responsibility for the management of internal projects or processes.
- Stakeholder engagement and Communication.
- Performance Measurement and reporting of projects using appropriate tools and techniques.
- Change Management and Continuous Improvement.
- Project risk assessment, including data security concerns.

What we are looking for

- Relevant work experience in project/program management and a SCRUM/Agile environment.
- 3rd Level degree.
- Recognised Project Management qualification - PRINCE2/PMP Certification.
- Deep knowledge and experience of varied project management tools and systems
- Experience in data analysis and KPI reporting
- Experience in change management and process improvement using Lean and Kaizen methods.
- Commercial and financially literate with an understanding of budgeting, cost control and ROI.
- Excellent Communication Skills and stakeholder management experience
- Proactive and organized professional with a demonstrated commitment to achieving business goals
