RE_IMAGINE YOUR FUTURE
Senior Product Designer
Dublin, Ireland

Munich Re is one of the world's largest reinsurers providing solutions for complex risks to 40 million clients in over 30 countries.

Munich Re Automation Solutions are the market leader in providing new business processing and under-writing automation solutions to the life insurance industry. The Automation Solutions division of Munich Re delivers exceptional solution-based expertise that enables straight through processing (STP), increases sales and reduces costs for life insurers worldwide.

Munich Re Automation Solutions have enabled STP and "instant issue" for insurers and banks globally, who are now able to auto-assess the majority of new applications at the point of sale for a variety of life insur-ance products across the full spectrum of distribution channels. This has been accompanied by a significant reduction in new business acquisition costs.

Headquartered in Dublin Ireland, the Automation Solutions division of Munich Re also has offices in Sydney, Tokyo, Singapore and Chicago.

About the role

An exciting new opportunity to be part of a newly forming team to work on a cutting-edge greenfield project within Munich Re! You will help lead small autonomous teams to deliver SaaS solutions that create exceptional value for our customers.

Teams in Munich Re are typically comprised of a Designer, User Researcher and several developers working with an Architect and Product Owner. The teams are kept small to eliminate scale challenges and communication overhead. This also allows you to be deeply design and product-focused as well as spend time coaching other designers that you work with.

You and the team will design and build innovative solutions to challenging problems that empower Munich Re's customers to reach new levels of success. You will maintain a high bar for quality as you work with Product Management and Engineering to help conceive, design, and develop world-class products. You will use your knowledge and expertise to multiply the overall output of the team.

What you will work on

- Define and execute on a consistent and engaging design strategy in partnership with the leadership team
- Take responsibility for the entire UX and design for the topics that you work on
- Collaborate with user researchers to identify needs, conduct user experience research and apply it to create original, high-quality work
- Generate creative ideas for products. Present and influence design concepts to stakeholders
- Contribute to the design and implementation of a highly-effective design system and related supports
- Lead UX thought leadership within the company
- Positively influence teams with motivation and a problem-solving attitude
- Demonstrated exceptional communication skills to articulate, present, and speak clearly about design decisions
- Occasionally travel when needed
- Learn and grow constantly. Feed your passion for self-improvement and make those around you better

What we are looking for

- A portfolio of previous work that users love
- An excellent understanding of visual design principles, style guidelines, design processes, and creative workflow
- Experience and a strong understanding of qualitative and quantitative research methods: surveys, on-site / remote interviews, diary studies, usability tests, user journey mapping, personas and other research methods
- Experience creating wireframes, UI designs, design systems, graphic designs and interaction specifications
- Experience designing for mobile responsive layouts and working with Sketch, Figma (but not limited to) prototyping tools (e.g Flinto, Framer, InVision Studio, Axure) and the Adobe family
- Hands-on and passionate about contributing to research, experimentation and visual design processes
- Up to date on visual design trends
- Experience with agile product development practices and principles
- Highly organized and thrive in rapid-paced environments
- Ability to manage multiple projects simultaneously, with demonstrated success working within complex, fast-paced environments
- Strong mentorship with a passion for growing design teams, sharing knowledge and improving others
