HSB PLC is part of Munich Re

HSB Professional Loss Control is part of Hartford Steam Boiler (HSB), a subsidiary of Munich Re. Munich Re stands for exceptional risk solutions, consistent risk management, financial stability and client proximity. Munich Re – which pursues an integrated business model consisting of insurance and reinsurance – is one of the world’s leading reinsurers.

HSB is a leading specialty insurer providing equipment breakdown, other specialty coverages, inspection services and engineering-based risk management that set the standard for excellence worldwide. We anticipate risks and provide forward-thinking solutions that render tomorrow’s world insurable.

About HSB PLC

HSB Professional Loss Control offers effective solutions to clients seeking knowledgeable, third-party property loss control services. The recommendations we provide not only reduce risk, they also provide cost-effective alternatives, meet risk management goals and satisfy code requirements. Our technical consultants rely primarily on published National Fire Protection Association (NFPA) codes and standards as the basis for identifying fire hazards and protection features. PLC has been an active participant in the development of NFPA standards, which are generally recognized as basic practices for establishing appropriate fire protection.

Averaging more than 25 years of field experience, most PLC technical personnel have specific, highly protected risk (HPR) experience. To best serve client needs, these personnel are located throughout the United States.
