HSB PLC IS PART OF MUNICH RE

As a subsidiary of Hartford Steam Boiler, HSB Professional Loss Control is part of Munich Re. Munich Re stands for exceptional risk solutions, consistent risk management, financial stability and client proximity. Munich Re – which pursues an integrated business model consisting of insurance and reinsurance – is one of the world’s leading reinsurers.

HSB is a leading specialty insurer providing equipment breakdown, other specialty coverages, inspection services and engineering-based risk management that set the standard for excellence worldwide. We anticipate risks and provide forward-thinking solutions that render tomorrow’s world insurable.

PLC Full Access - your data 24/7

PLC Full Access is HSB Professional Loss Control’s web-based data management system, designed to help clients manage property loss control programs of any size more efficiently and effectively.

With PLC Full Access, you have complete, secure access to all data and information we have collected for you. This resource offers the most current and complete status of your facilities 24/7, with information available in real time.

More informed decisions - a click away

PLC Full Access’ features and functions are designed to help you make informed decisions. All data is fully searchable, allowing you to develop custom reports at various levels to meet your needs. The data also can be used for risk ranking.

Access to the data can be controlled at various levels, such as corporate level, division level or facility level, to assure that data are available only to those with a need to know. All data can be downloaded for export into other applications or external storage.

Property loss control surveys can be delivered in Word or other formats. PLC Full Access offers the ability to report and manage impairments without the need for other third-party software applications.
