

## ASME Inspection Services

HSB, a Munich Re company, is a technology-driven company built on a foundation of specialty insurance, engineering, and technology, all working together to drive innovation in a modern world.

HSB offers a wide range of pressure equipment inspection services - ASME Services, International Codes, Pressure Equipment Directives, and Third-Party Inspections.

### Authorized Inspection Agency

HSB understands the complexities of global pressure equipment compliance, relieving you of that burden.

HSB conformity assessments are based on a century and a half of inspection services experience. As the world's largest Authorized Inspection Agency (AIA) accredited by the American Society of Mechanical Engineers (ASME), HSB offers a range of inspection services for boilers, pressure equipment, nuclear components, and process and power plants. We provide pressure equipment inspections and engineering services to manufacturers, owners, and operators of pressure equipment. ASME Code symbol-stamped vessels are used in industries such as power generation (non-nuclear and nuclear), chemicals, food processing, and refining.

### Services

- **Inspection services:** HSB pressure equipment inspection professionals, located globally, have saved our clients millions of dollars by avoiding construction delays, reducing rework and eliminating costs associated with non-compliance.

- **Documentation development:** HSB helps clients develop complete quality control manuals and procedures for their unique situations.
- **Subcontracting services:** We investigate the qualifications of clients' subcontractors to evaluate whether work performed meets client and ASME requirements.
- **Design services:** Our engineers provide design support for clients seeking to manufacture equipment that meets ASME Code.
- **Customized training:** HSB offers a variety of training seminars to help clients use the ASME Codes and Standards effectively and competitively. We show clients how to apply the Code to an existing process, while minimizing impact on production.

## HSB provides

- **Single-source inspection service:** HSB can perform inspections to all of your pressure equipment requirements.
- **Global coverage:** HSB's engineers and inspectors around the world allow us to cost-effectively manage complex, multi-site inspections involving a variety of standards.
- **Local presence:** We have local representation in Europe, Asia, and the Americas, so you can strategize globally and act locally.
- **Responsiveness:** HSB responds quickly to urgent situations that require accelerated project schedules and high levels of responsiveness.
- **Global inspection staff:** HSB has more than 450 pressure equipment inspectors and supervisors. We have National Board nuclear and non-nuclear-commissioned inspectors in Asia, Europe, the Middle East, North, and South America.
- **Client focus:** HSB ensures that the delivered services meet clients' needs and requirements. Services can include everything from incoming material approval to installation and testing.
- **Experience:** HSB brings together our knowledge of the ASME Codes and Standards, quality program development and surveillance activity, and combines it with our unique understanding of many international codes, which helps you save time and money.
- **Support:** HSB is approved to perform pressure equipment inspections to almost all international codes and standards and often assists clients with design reviews and product inspections for international use.
