

How aiSure™ provides a “seal of quality” for AI solutions.

cloudcover.

Ransomware Protection and Prevention with a performance guarantee

CloudCover offers a fully integrated cybersecurity platform that addresses risk aware, risk control, and risk transfer element for its clients. CloudCover's patented AI-generative, automated microsecond network detection is a real game changer that can stop the increase in attacks. CloudCover lowers the risk of a customer's exposure of security breach without causing undue delay or disruption of data transmission.

Add a performance guarantee – and customers' networks are protected from cyber attacks

With a performance guarantee backed by a Munich Re Group company, CloudCover's Ransomware Warranty protects organizations financially from malware that turns into a ransomware event.

deep instinct

True prevention and protection against ransomware

Deep Instinct provides a deep learning cybersecurity framework to identify and prevent ransomware and other malware before they even execute.

The prevention-first approach detects attacks in milliseconds, faster than the fastest known ransomware is able to encrypt and cause harm. Preventing unknown threats is far more effective than any other endpoint protection or detection and response solutions (EPP or EDR).

Add a performance guarantee – and customers benefit from knowing that Deep Instinct's liabilities are backed by a company with financial security

Ascent's tool is backed by an insurance from Munich Re Group that provides a quality rating and coverage if the tool does not perform as expected.

COMPREDICT

AI-based Virtual Sensors with a performance guarantee

COMPREDICT provides a purely software-based sensor technology called Virtual Sensors that enables hardware sensors replacement in cars or adds new measurement capabilities, using automotive expertise and machine learning. It provides a comprehensive understanding of vehicle health and usage, enabling OEMs, Tier 1 suppliers, and fleet operators to predict component failures and detect necessary replacements in time, thereby maximizing the quality of vehicles and minimizing their environmental impact.

Add a performance guarantee – and the AI algorithm has an additional seal of trust and quality.

With a performance guarantee backed by a Munich Re Group company, COMPREDICT provides its customers with quality assurance for their Virtual Sensors, and offers financial compensation in case of the AI algorithm underperforming.

raicon

Autonomous solar energy operations with a Performance Guarantee

raicon has developed a first of its kind, cloud-based and AI-driven software called autonomous operations center (AOC) for photovoltaic (PV) plants. raicon guarantees 100% fault detection, even minor measurable anomalies, without generating false alarms. This revolutionises the operation of PV plants and accelerates the energy transition by optimising resource utilisation and increasing the efficiency of solar asset management.

Add a performance guarantee – and the risks of investment in the AI-driven autonomous operation center are mitigated

With a performance guarantee backed by a Munich Re Group company, raicon promises 100% fault detection and 0% false alarms on its innovative technology, which allows investors to invest confidently and eases customers' concerns about trusting AI-driven solutions.

kasko2go

AI-based road risk assessment with a performance guarantee

kasko2go provides an AI-based road risk assessment solution for insurers, that calculates the risk of being involved in an accident on a given road segment by collecting data from various sources and analysing environmental data.

With kasko2go's technology, complex risk assessment calculations become easier, underwriting processes are enhanced and claims can be reduced.

Add a performance guarantee – and road insurers get accurate risk assessments

With a performance guarantee, backed by Munich Re group, kasko2go can now guarantee their customers the accuracy of their Risk Factor Report for pre-defined road segments and provide with financial compensation in the event of technology underperformance.

GROWERS EDGE

Innovative Crop Plans with warranty backing for farmers

Growers Edge builds industry-leading fintech and data solutions to empower agriculture retailers and input manufacturers. Adopting innovative ag technologies like new seed, chemicals or earth-conscious practices has been intimidating and costly, with no financial backstop for farmers. Leveraging their comprehensive analytics capabilities, Growers Edge partners with retailers, offering warranty-backed crop plans that help farmers adopt new technologies and practices leading to secured yield.

Add a performance guarantee – and farmers have confidence to adopt the latest yield optimisation techniques without compromising financial security

Munich Re assessed and verified the yield performance of the crop plans and backs the yield-focused warranty programme through reinsurance. Together, Growers Edge and Munich Re encourage innovation adoption while reducing risks for farmers at scale.

FUGU

Fraud prevention with a performance guarantee

FUGU's multi-layer anti-fraud solution, combined with automated, transaction-level, post-checkout Know Your Customer (KYC) capabilities, allows online sellers to validate the most suspicious transactions while reducing false declines. It effectively detects friendly fraud attempts, resulting in minimum exposure to future chargebacks. FUGU's self-learning algorithms collect data at various points of the transaction life cycle and allow a broader and more data-based risk assessment analysis.

Add a performance guarantee – and online sellers can safely accept transactions

With a performance guarantee backed by a Munich Re Group company, FUGU can offer a chargeback guarantee for transactions that were accepted. If any of the guaranteed transactions were fraudulent, the client is indemnified for the value of such transactions.

TWAICE

Battery analytics with a performance guarantee

TWAICE's AI-based Battery Analytics platform collects information relating to the State of Health (SoH) of batteries in one place in order to optimise the development and operation of batteries for electric fleets. The platform enables data-driven decisions to be made regarding asset management, operational costs and risks.

Add a performance guarantee – and customers can rely on prediction-based decisions

TWAICE now guarantees the accuracy of SoH estimation for batteries. The financial risks resulting from prediction-based decisions are covered, meaning customers have limited risk when relying on TWAICE's technology. This guarantee is backed by a Munich Re Group company.

spectrum labs

Reducing toxic content on online communities

Spectrum Labs' patent-pending technology helps companies, such as social media, dating apps, gaming, marketplaces, and eLearning companies, recognize and respond to over 40 harmful behaviors and toxic content posted on their online communities.

- Cuts content moderation efforts by 1/2
- Increases toxic content detection x 10

Add a performance guarantee – and brands become more attractive

If Spectrum's solution doesn't work as expected, the performance guarantee, insured by Munich Re, will allow Spectrum to refund back to the client.
