Munich Re's Smart Mobility program is a simple approach to the complex issues surrounding auto risks. It delivers customized technology-driven risk management solutions (including Mentor) to help mitigate our clients' auto losses.

### Product summary

The Mentor program by eDriving, LLC is a smart-phone based app that helps drivers manage their behaviors, change their habits and drive safely. A personal driving coach, it engages the driver with insights and encouragement while fostering healthy competition between peers. In addition, Mentor provides organizational visibility into drivers' behaviors to identify areas requiring intervention.

At a driver level the app:

- Measures each driver's specific performance in key areas, such as braking, acceleration, cornering, speeding and distraction
- Offers immediate feedback to the driver after each trip and plots on a map exactly where events (e.g., hard braking) occur
- Includes weekly and monthly trending charts

- Provides a score for each trip as well as the cumulative FICO<sup>®</sup> Safe Driving Score\* based on measured behaviors
- Demonstrates how drivers compare with their teams, the top 10% or the entire company
- Issues short interactive coaching modules through an in-app playlist based on driver progress
- Enables drivers to exclude passenger trips from their score
- Detects trains, ferries and airplane transportation

The portal provides the following information at a group and/or driver level:

- The overall average FICO<sup>®</sup> Safe Driving Score\* across the top 10%, a team, all drivers or the entire company
- Percentage score change from week to week
- Separate ratings for acceleration, braking, cornering, speeding and distraction
- Percentage of trips flagged as passenger trips
- Progress on completing the assigned coaching modules

To learn more, contact your account representative, or see us at [munichreus.ly/smartmobility](http://munichreus.ly/smartmobility) today, and fuel up!

\*The FICO<sup>®</sup> Safe Driving Score has nothing to do with the FICO<sup>®</sup> credit score. No credit or financial data is collected or used in the FICO<sup>®</sup> Safe Driving Score—only each driver's actual driving behaviors and engagement in the Mentor program. Continued use of GPS can decrease phone battery.
