

Munich Re Life US

EDGE™

Munich Re Life US's EDGE manual takes an evidence-based approach to determining risk and expanding insurability. Our team of physicians, underwriters, data analysts and biometric experts conduct research and continually update the manual so that you can make competitive offers supported by science.

EDGE is accessible any time, anywhere via computer, tablet or smartphone. It is thoughtfully designed for use by underwriters at all levels of experience. EDGE features annotating at an individual and company level, full searching and bookmarking, as well as a comprehensive library of technical papers on emerging trends and medical topics with over 100 training videos.

EDGE offers 14 calculators covering blood pressure, build, suspected and confirmed coronary artery disease, cholesterol, foreign travel, eGFR, LVH, LFTs, mature age, melanoma, and prostate, thyroid, and breast cancer.
