Munich Re's Smart Mobility program is a simple approach to the complex issues surrounding auto risks. It delivers customized technology-driven risk management solutions (including Orion) to mitigate our clients' auto losses and prepare for the future of mobility.

Product summary

Orion Fleet Intelligence targets aggressive driving behavior leading to improved fleet safety and operating performance. Orion's products provide tailored analytics using real-time vehicle data to deliver hands-on driver coaching and oversight, yielding measurable safety and operating results.

Types of losses potentially avoided

- Losses caused by aggressive driving behaviors
- Operational losses due to unauthorized use of vehicles

Benefits

- Analytics tailored to the relevant fleet metrics and configurable based on driver policy parameters
- Best practice driver coaching resulting in behavior changes
- Reduced fuel and operational costs
- Plug and play technology promotes ease of install and use

Typical field results reported by Orion for other clients

- 75% reduction in high-risk driving
- 20% reduction in claims
- 50% reduction in idle time
- 10% reduction in overall fleet miles
- 90% reduction in unauthorized travel
