\(^1\) Previous year’s figures adjusted owing to first-time recognition of Munich Health as a separate segment.
\(^2\) Segmental figures, before elimination of intra-Group transactions across segments.
\(^3\) Thereof major losses of 15.7% (8.3% in 2009) after net run-off gains of 0.7%.
\(^4\) Including share buy-back (€0.3bn in Q4) and increase of unrealised gains/losses on fixed-interest securities (to €1.3bn).

Additional information on IFRS accounting figures and first indication for key economic figures

**Munich Re (Group)**

- Tax-free gains in addition to reduced tax risks leading altogether to net tax income in Q4 2010 of €167m
- Increase of economic risk capital at year-end mainly a consequence of low interest rates, higher implied interest-rate volatility and higher reinsurance risk exposure; increase of available financial resources

**Reinsurance**

- Major losses (loss ratio) in 2010\(^1\) of 15.7% (8.3% in 2009)
  - Nat cat: €1,564m (11.0%), man-made: €664m (4.7%)
- Moderate reserve releases while further strengthening confidence level
- Significant major losses in Q4
  - Flood Australia (€267m) and increase for earthquake New Zealand (€111m) to €339m
- After normalisation of major losses, satisfactory business development in property-casualty
- Reserve strengthening and DAC write-down for long term care business in the USA in 2010: €315m (€215m after tax)
- Apart from that, pleasing business development in life
- Increase of MCEV in 2010 as a consequence of strong new business growth and currency effects

**Primary insurance**

- Major losses in 2010
  - Germany (esp. Xynthia, tornados, flood)
  - International (esp. flood and frost damage in Poland)
- Combined ratio Germany: 89.8%, international: 107.8%
- New business in life
  - €2.920m, increase of 16.7% compared to last year, mainly driven by growth of single premium business (+20.6%); regular premium business in Germany declining (~2.6%)
- MCEV development
  - Some reduction due to decline of risk free interest rates, in life more than in health. No illiquidity premium applied.

\(^1\) Including net run-off gains.
Preliminary key figures 2010 – Premium development

**Agenda**

- Preliminary key figures 2010
- Renewals in property-casualty reinsurance
  - Summary
  - Backup
Ongoing competitive market environment with varied trends per segment and market

Market environment
- High level of capital in the (re)insurance sector – Capital base artificially increased due to valuation of bond portfolio (low interest-rate environment)
- Overall, continued softening of prices on primary as well as reinsurance markets
- Exceptions in few individual segments and/or markets with recent major loss experience
- Low interest-rate environment with negligible influence on price development

Competitors
- Abundant capacity provided and thus no constraints in all lines of business
- Ongoing competitive environment, however, in general disciplined behaviour of reinsurers
- In selected segments, some reinsurers apply top-line driven growth strategy

Clients
- Pressure on reinsurance budgets due to price decreases in the insurance sector
- Seek for solvency relief observable especially in growth markets

Renewals in property-casualty reinsurance – Munich Re portfolio

Pleasing results due to sustainable Munich Re value proposition

Munich Re approach
- Consistent cycle management on bread-and-butter-business where general market trends prevail: Conscious decision not to renew business if profitability targets are not met
- Munich Re to deliver on value proposition that enables access to not freely available business opportunities

Impact on Munich Re portfolio

PRICE
- Total portfolio experienced stable price development
- Few segments have seen price increases due to recent loss experience (e.g. Offshore Energy, Australia) or general market trends (e.g. UK motor)
- The bulk of the business shows generally flat to slightly negative price movement

VOLUME
- Cycle management: Deliberate top-line reduction in case of inadequate price levels or in unattractive segments
- Value proposition: Strategic new business and extension of profitable client relationships compensates for volume reduction
- Geographical diversification as an enabler for profitable new business generation

TERMS AND CONDITIONS
Stable terms and conditions with a softening trend

Portfolio quality maintained in difficult competitive environment
Fragmentation of reinsurance market intensifies

- Competitive pressure in (local) commodity business continues as ample reinsurance capacity meets stagnating demand...
- ...leading to overall softening markets...
- ...while demand in know-how-intensive areas exceeds supply
- As a consequence, providers of tailor-made solutions can partially decouple from the cycle and maintain profitability

Strict cycle management
- Ample reinsurance capacity putting pressure on prices for pure commodity business
- Conscious reduction of unprofitable business
- Bottom-line orientation prevails

Leveraging Munich Re’s competitive advantage
- Growth in business that is not freely available on the market
- Munich Re’s access to this business is based on the unique combination of solution-oriented long-term client relationships and high underwriting sophistication

Premium split – Lines of business mix largely unchanged, strategic growth in Asia/Pacific

Slight trend to casualty, driven by selective growth with tailor-made structured solutions

Growth in Asia, driven by new quota share deals while reducing existing business in Europe

## Agenda

- Preliminary key figures 2009
- Renewals in property-casualty reinsurance
- Summary
- Backup
Munich Re to continue to place high emphasis on sustainable earnings

Key takeaways

Resilient earnings in a challenging environment with high claims activity and low capital market yields

Pleasing development at the January renewals based on strict bottom-line orientation in tandem with profitable strategic and opportunistic growth

Solid capitalisation and good operating performance enable increase of dividend to €6.25 per share and continuation of share buy-back programme post AGM 2011

Outlook 2011¹: Net result expected to be about the same as the high level of 2010 – Slightly improving technical result

¹ Assuming normal claims activity and stable capital markets.

Note regarding the presentation of the previous year’s figures

- For the new reporting format in connection with the first-time application of IFRS 8 “Operating Segments” as at 1 January 2009, several prior-year figures have been adjusted in the income statement.
- For the sake of better comprehensibility and readability, we have refrained from adding the footnote “Previous year’s figures adjusted owing to first-time application of IFRS 8” to every slide.
- For details and background information on IFRS 8, please read the presentation “How does Munich Re apply the accounting standard IFRS 8 “Operating Segments”?” on Munich Re's website (http://www.munichre.com/en/ir/service/faq/default.aspx).
- On 30 September 2008, through its subsidiary ERGO Austria International AG, Munich Re increased its stake in Bank Austria Creditanstalt Versicherung AG (BACAV) and included it in the consolidated group. The figures disclosed at the time of first consolidation were of a provisional nature. Therefore, several previous year figures have been adjusted in order to complete the initial accounting for a business combination (IFRS 3.62).
- Previous year figures also adjusted according to IAS 8.
