Corporate responsibility in business at Munich Re

Renate Bleich
Global Head of Sustainability

Paris, 16 March 2018
A strong commitment towards corporate responsibility

International co-operations

UNEP FI (since 1999)
Munich Re has signed the UNEP FI’s climate declaration.

UN Global Compact (since 2007)
Munich Re has been a member of the UN Global Compact since August 2007. The ten principles of the UN Global Compact provide guidance for action in our business and set the basis for our corporate responsibility activities.

Principles for Responsible Investment (PRI) (since 2006)
Munich Re actively developed the UN Principles for Responsible Investment (PRI), which it signed in April 2006 – the first German company to do so.

Principles for Sustainable Insurance (PSI) (since 2012)
Munich Re played an active part in developing the Principles for Sustainable Insurance (PSI) since 2007 and was a founding signatory in June 2012. The PSI aim at anchoring ESG criteria in the core business along the value chain.
Principles for Sustainable Insurance (PSI) – A voluntary and aspirational global framework for the insurance industry

Principles for Sustainable Insurance

1. Embed ESG in decision-making along the value chain
2. Work together with clients and business partners to raise awareness, reduce risk and develop solutions
3. Engage with governments, regulators and other key stakeholders
4. Demonstrate accountability and transparency
Shared value creation focuses on connecting societal and economic progress.

Responsible behaviour increasingly relevant for competitive advantage – companies need to do good and do it well.

The concept of shared value …

- Corporate Responsibility in Business
- Environmental management
- Social impact projects
- Reporting and communication

… how we live it at Munich Re
Our business activities contribute to achieving the Sustainable Development Goals

- HDFC ERGO offer microinsurance policies in the rural sector in India (e.g. weather-indexed, health, personal accident & fire, special policies for farmers)
- Public-sector risk transfer solutions (e.g. Pandemic Emergency Financing Facility)
- Digital Doctor App
- Renewable energy and energy efficiency solutions by Green Tech Solutions (e.g. solar performance warranty and option cover for photovoltaic)
- City Innovation Platform
- Earthquake/landslide risk protection of Indian city by Munich Re & GeoHazards International
- Partnership with Institute for Business and Home Safety: improved safety and construction standards for buildings in the US
- Public-sector risk transfer solutions (e.g. Carribean Catastrophe Risk Insurance Facility, African Risk Capacity, Pacific Catastrophe Risk Assessment and Financing Initiative)
- Climate KIC
- Solarkiosk

- Crop failure insurance by System Agro
Definition of environmental, social and governance (ESG) aspects at Munich Re

Environment
- Pollution
- Natural resources and biodiversity

Social
- Political context and public awareness
- Labour and working conditions
- Health, safety and security for the community
- Displacement of people
- Cultural heritage

Governance

- Compliance
- Consultation and transparency
ESG framework

Sensitive issues, Munich Re position and measures

**Banned Weapons**
Policy on cluster munition and land mines, part of GUGL

**Arctic Drilling**
Guideline, risks to be referred to Arctic Drilling Panel

**Oil Sands**
Position paper, referenced in GUGL

**Fracking**
Position paper, referenced in GUGL

**Mining**
Position paper referenced in topic paper mining

**Investments in Farmland**
Mandatory ESG check for investments

**ESG Tool**
Assessment of different industries, best practice in credit/surety

**ESG country rating**
ESG information included in Munich Re Country Risk Assessment

**Currently in development**
→ new sustainable asset management approach
Based on Sustainalytics’ “Country Risk Monitor” with sustainability ratings for 165 countries, covering 31 indicators. This tool is used by MEAG for sustainability rating of sovereign bonds and offered as an additional resource to underwriters in Reinsurance.
ESG criteria for engineering projects – Tool implemented as best practice

Corporate responsibility in business at Munich Re, March 2018

ESG Criteria Evaluation

Environmental Implications
- Pollution prevention
- Conservation of natural resources and biodiversity

Social Implications
- Political context and public awareness
- Labour and working conditions
- Health, safety and security for the community
- Displacement of people
- Cultural heritage

Governance Implications
- Responsible and correct planning and evaluation
- Compliance
- Transparency

Final assessment

Web links for further information:
- Munich RE
- World Economic Forum
- Transparency International
- Corruption perceptions index
- Labour standards database
- UNESCO world heritage site

Pollution prevention
- Core: if the substances used in processing (e.g., cyanide in many gold mines) do not form part of a closed-loop process
- If possible risks to groundwater (e.g., from spoil-heap leaching) have not been examined beforehand and appropriate measures taken
- If the mine poses a risk to the environment (excluding the long-term)

PROs:
- If an environmental impact assessment is available in accordance with the relevant legislation
- If overburden, tailings and water-polluting consumables and supplies and, in particular, waste requiring special monitoring, are stored, deposited and disposed of in such a way that there is no negative impact on the environment as a result
- If a plan exists for monitoring deposited residues
- If overburden and waste are also taken into account as part of emergency management (e.g., measures in the event of unplanned discharges)
Reputational risk committees for escalation of controversial single underwriting cases

Reputational risk committee (RRC)

Mission
- Consultation of business segments
- Analysis and assessment of individual cases

Examples of requests
- Investment in / (re)insurance of specific entities / Groups
- (Re)insurance of potentially polluting projects
- (Re)insurance of projects in specific countries
- Insurance of clinical trial participants
- Critical products

Working mode
- Reporting of critical issues prior to closing of a deal
- RRC responds within 48 hours, giving clear guidance
- Escalation to Board of Management by RRC coordinator in case of non-compliance

Reputational risks are monitored and steered within RRCs
Carbon neutrality based on environmental management and CO₂ emission reduction

Our steps to carbon neutrality

**Data** gathering and measuring CO₂ emissions → since 2015 externally verified by a third party

**Reduction** of CO₂ emissions by saving energy, water, paper, waste and business travel and improving carbon impact of consumed goods and services

**Substitute** conventional electricity by green electricity

**Compensate** remaining CO₂ emissions through purchasing carbon credits

A Group-wide environmental management system is in place and approx. 80% of employees are covered

Target Munich Re Group 2020: −35% CO₂ emissions per employee since 2009 → 2017 > −35% CO₂ reduction

Target Munich Re Group 2020: 100% electricity is from renewable sources → 2017 > 71% electricity used from renewable sources

Since 2015: Munich Re Group is carbon neutral
Shared value is the guiding principle of our social impact activities

Example CR social impact project

- We find and support solutions for adapting to and mitigating climate change
- We cooperate with innovative partners
- Munich Re and ERGO are pooling their resources
- We offer experience, expertise and financial support

Two partners

Together with the EU’s main climate innovation initiative, Munich Re and ERGO are fostering cleantech start-ups during several batches. First batch started in October 2017. Next batch starts in April 2018.
