Are your commercial policyholders prepared for a data breach?

The way a business responds to a data breach can mean the difference between preserving its clients' trust or losing it. When a breach event occurs, time is of the essence.

Now your policyholders can prepare an effective data breach response plan in advance of a crisis to help protect their client relationships and business reputation.

eRiskHub® data breach risk management portal

eRiskHub® is a web-based data breach risk management service specially designed for Data Compromise policyholders insured through our partner carriers.

Containing a variety of resources and ready-to-use tools, eRiskHub® can help insureds better understand their risks and minimize the effects of a data breach should one occur to their company. There's no cost: it's a complimentary service for Data Compromise policyholders.
