

Community centre's boiler cracked Equipment breakdown loss

HSB Canada, part of Munich Re, is a technology-driven company built on a foundation of specialty insurance, engineering, and technology, all working to drive innovation in a modern world, to keep you ahead of risk.

On New Year's day between 5:30 a.m. and 10:30 a.m. a short circuit occurred in an electrical connection box. The failure produced a total shutdown of the boiler's pump and low water cut-off device. When the boiler "dry fired" it overheated, cracking all seven lower end sections.

Attempts to weld the cracked sections proved futile. The boiler had to be replaced with a new model.

Loss details

Nature of Business:
Community centre
Type of Equipment:
Cast iron heating boiler
Age of Equipment:
3 years

Final Loss Settlement Amount:
Physical damage -
\$14,293.48
