

Energy risk solutions

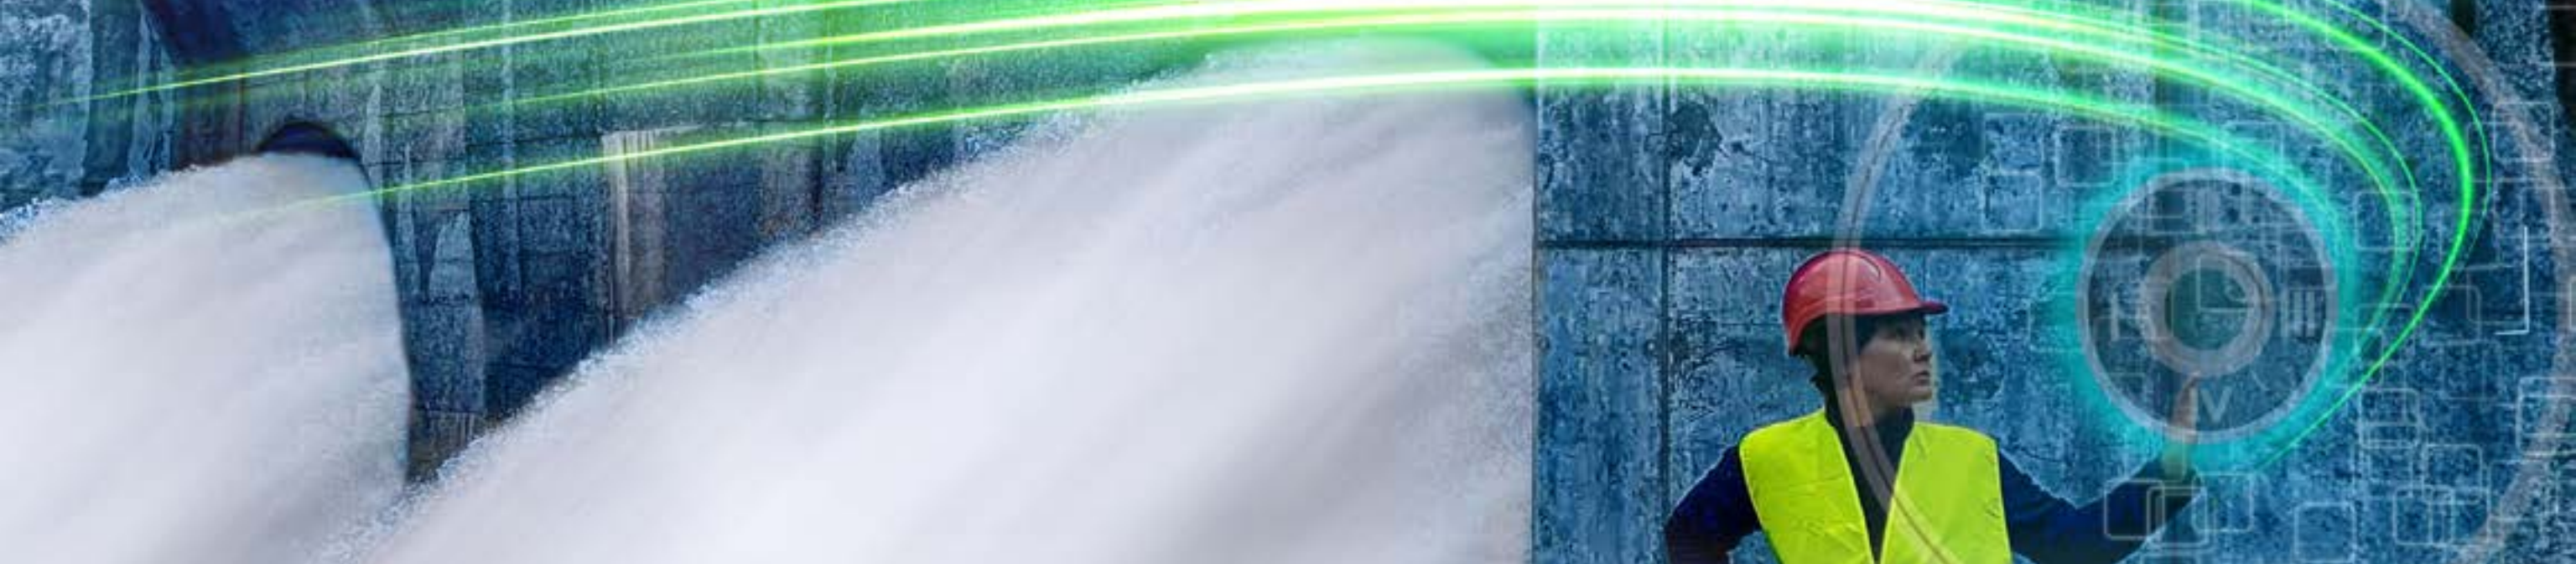

HSB: A powerhouse in renewable energy

A Munich Re company

Let's get
started 

As a preeminent insurer of renewable, alternative, and sustainability technologies, HSB sets the standard for excellence worldwide.

Risks become more complex in an evolving, unpredictable landscape — and the need to partner with an industry leader increases. As a pioneer in the renewable energy market, HSB acts a stabilizing presence that offers long-term insights, deep engineering expertise, and proven risk management strategies so policyholders can better manage their exposures and protect their assets.

Explore the advantages and capabilities HSB offers — and see why we are a powerhouse in renewable energy.

The HSB difference

Specialized underwriting

HSB understands the nuances of the evolving energy landscape. Our extensive industry experience provides us with a broad appetite and the competency to underwrite virtually any power generation technology.

Engineering expertise

HSB has been involved with the energy market since the beginning. Our engineers help create industry standards for the equipment and technologies necessary to generate and distribute renewable energy. They also evaluate complex equipment risks, perform jurisdictional inspections, make loss-control recommendations, and provide specialized risk management services.

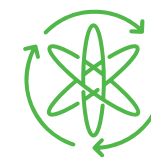

Unsurpassed financial strength

Rated A++ (Superior) by AM Best, HSB provides stability in a growing, changing market.

Responsive claims support

Our dedicated energy claims team averages nearly 20 years of experience. Having this deep knowledge of the industry facilitates better service and promotes long-term client relationships. HSB boasts an in-house forensic accounting team and engineers with deep expertise to help resolve complex claims. Additionally, our well-established vendor relationships can be useful in alleviating supply-chain issues.

Commitment to renewable energy

HSB, part of Munich Re, insures nearly 100 gigawatts of energy generation capacity throughout the United States and Canada. Munich Re has invested \$2.6 billion in renewable energy assets around the world. Munich Re's global clean energy investments total over 1.5 gigawatts of energy generation capacity — enough to power about 500,000 standard homes.

Renewable energy risk solutions

HSB's capabilities include Builder's Risk through commissioning and operational coverages. Our operational property and Builder's Risk solutions cover a diverse range of renewable, alternative, and sustainability technologies. Coverage protects against property damage caused by earthquakes, floods, named storms, and severe convective storms.

- Operational Property All-Risk, including Business Interruption, Extra Expense, and Equipment Breakdown
- Builder's Risk, including Delay in Start-Up, Soft Costs, and Equipment Breakdown

Included with coverage are jurisdictional inspections of boilers and pressure vessels.

Appetite at a glance

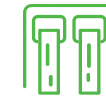

Our operational property and Builder's Risk solutions cover a diverse range of renewable, alternative, and sustainability technologies, including:

Battery Energy Storage

Conventional Power

Hydroelectric

Renewable Natural Gas

Biofuel

Electric Vehicle Charging

Hydrogen Fuel Cell

Anaerobic Digestion

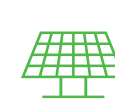

Biomass

Geothermal

On-Shore Wind

Solar Photovoltaic

Excluded classes: Nuclear, Off-Shore Wind

Capacity

Up to \$250,000,000

Participation

- Primary
- Quota-share
- Excess

Minimum premium

- \$10,000 solar
- \$25,000 for all other

Jurisdictional Inspections

In addition to complex risk evaluations, loss control inspections and other specialized risk management services, jurisdictional inspections of boilers and pressure vessels are included with coverage. With a staff of over 600 inspectors and engineers commissioned by the National Board of Boiler and Pressure Vessel Inspectors and the American Society of Mechanical Engineers, HSB conducts hundreds of thousands of jurisdictional inspections in the U.S. every year.
