Product development

Our insurance experts develop innovative insurance solutions to cover risks with unusual and unique characteristics. We tailor coverages to meet the special needs of your homogenous group or association program business.

Policy processing

Our policy-management systems can be used by your operation to support standard ISO lines and workers' compensation. Other lines may be available on these platforms with customization.

Claims handling

An unbundled, streamlined approach allows for third-party administrators, approved and with oversight by Munich Re claims experts, to provide efficient claims processing to help improve your operations.

Underwriting operations

Extensive market presence of best practices allows us to provide an independent evaluation of your insurance and reinsurance programs. Once recommendations are agreed upon, our advisors will remain available for implementation assistance.

Risk control oversight

Identify, prevent, and mitigate the impact of risk with services that include loss control assessments, causal analysis, trend analysis, training, assistance in loss control programs, work site assessment, and selecting third-party specialty consultants.

Catastrophe risk management

Expert analysis on natural and non-natural property perils and exposures, including technical and scientific catastrophe risk modeling issues. We evaluate and work with you to address catastrophic exposures arising from casualty lines of coverage.
