ALLFINANZ

Your trusted underwriting intelligence platform

Because underwriting needs more than automation

One platform.
Five Core Capabilities.

Capture

No more one size fits all. Applicants can have unique journeys – online, through our new accessible screens, or offline, via structured text, conversational chat, voice or data upload.
No matter how unstructured and non-linear application data is captured, your underwriting rules are always applied. Consistently. Every time.

Enrich

Connect with data sources, including internal, third-party evidence or predictive models through your ALLFINANZ platform and bring all applicable information into one central location for intelligence led decisioning.

Orchestrate and govern

Governed by user permissions, empowered underwriters create and maintain your underwriting rules and philosophy. Build the rules, test changes, and publish your rulebooks, create audit ready reports on changes, leverage embedded AI tools, all on the ALLFINANZ platform.

Review

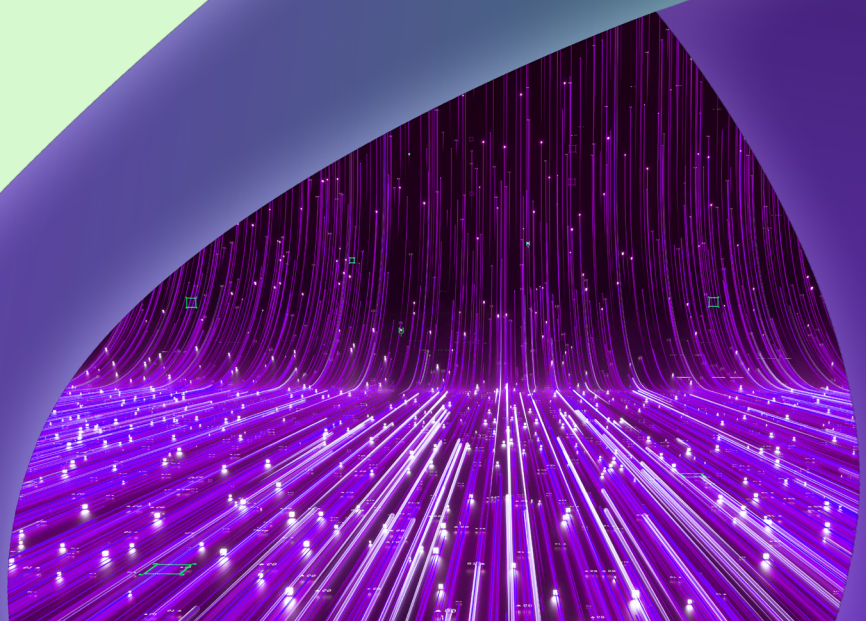
Easily access completed interviews and underwriting outcomes and route complex cases to the most appropriate team, to ensure all information is gathered, reviewed and each decision is fully documented with a robust audit trail.

Optimise

Access more than 60 ready-made dashboards, with the ability to create dashboards or export your data. Users also have the ability to ask questions in natural language to get actionable insights through embedded AI tools.

Our AI tools are purpose-built to maximise the underwriting capabilities and leverage your data within the wider agentic ecosystem. This intelligence led approach will help you to share your underwriting capabilities and new business data with more people across your business, improve your customer experience, enable actionable insights and ensure business growth.

The ALLFINANZ platform is SOC 2 Type II and ISO 27001 certified and is continuously monitored by automated tooling and dedicated specialists.



About us

Munich Re Automation Solutions, a division of Munich Re, is the global leader in digital underwriting and decision intelligence for the life insurance industry, with more than 40 years of experience helping insurers transform the customer experience of insurance. The ALLFINANZ platform is the trusted foundation for underwriting; bringing together rules, data, AI, and human expertise. This enables transparent, consistent, and scalable decision-making across channels and markets. By empowering insurers to continuously adapt underwriting strategies, integrate new sources of intelligence, and govern decisions with confidence, ALLFINANZ helps organisations accelerate growth while maintaining trust at every decision point.

Because underwriting needs more than automation.
