

Turn theory into practice

MR HealthTech Ltd, a Munich Re division, is one of the world's leading technology vendors to the Health Insurance industry. It provides state-of-the-art software platforms designed to support its customers end-to-end reliably and offer them solutions that help them address their business objectives while maximizing profitability potential. It currently operates in 19 countries, in 4 continents and supports 24 organizations.

Due to our increasing demand for designing and implementing best-of-breed software solutions, at our Athens Office, we are seeking specialists for the following position:

Business Analyst

PROFILE

The Business Analyst is the vital link between information technology capacity and the business objectives. We are looking for an accomplished business analyst with in-depth experience of completing detailed business process analysis and requirement gathering to enable the delivery of complex software development projects.

KEY RESPONSIBILITIES

- Define configuration specifications and business analysis requirements along with reporting and alerting requirements
- Understanding, designing, documenting and maintaining business processes and workflows and their relationships to current and future software solutions.
- Report on common sources of technical issues or questions and make recommendations to product team
- Assisting business users, project managers and leadership in optimizing the scope, benefits and risks
- Support development teams to ensure a solution meets its business requirements
- Constantly be on the lookout for ways to improve monitoring, discover issues and deliver better value to the customer
- Read and interpret documentation such as requirements definitions, installation instructions, technical articles and procedure manuals
- Ensure all documents are reviewed, clarified, organized, and conformed to organizational standards

REQUIRED SKILLS

- University level degree (or higher education institute) in Computer Science, Information Technology or relevant field of study.
- Expected to have 5+ years' experience in Business / IT Systems Analysis
- Proven record in gathering and documenting business requirements and translating them into IT business solutions.
- Knowledge and experience in the Insurance industry will be considered an asset
- Certification in Business Analysis will also be highly appreciated
- Ability to function in an agile development environment
- Strong written and verbal communication skills including technical writing skills

WE OFFER

- Competitive compensation
- Continuous training
- Enjoyable and stable working environment
- Leading-edge technology
