

Turn complexity into vision

MR HealthTech Ltd, a Munich Re division, is one of the world's leading technology vendors to the Health Insurance industry. It provides state-of-the-art software platforms designed to support its customers end-to-end reliably and offer them solutions that help them address their business objectives while maximizing profitability potential. It currently operates in 19 countries, in 4 continents and supports 24 organizations.

Due to our increasing demand for designing and implementing best-of-breed software solutions, at our Athens Office, we are seeking specialists for the following position:

QA manual Test Engineer

PROFILE

The QA Manual Test Engineer will analyze the requirements of the customer and design testing scenarios that will demonstrate conformance to functional and non-functional requirements.

Required Skills:

- University level degree (or higher education institute) in Computer Science, Information Technology or relevant field of study.
- 3-5 years of experience in testing services, with experience falling into the following range: creation and execution of functional test cases
- Familiar with understanding requirements, use cases and design specifications and able to define detailed test cases from these artifacts.
- Excellent knowledge of testing and development methodologies and their interaction.
- Very good knowledge of testing and development tools such as Postman, SOAPUI, SQL Developer, Git, Jira.
- Experience with Selenium Webdriver will be an asset.
- Good oral and written communication skills.
- Very good command of English language.

Key Responsibilities:

- Test Plans creation based on the analysis and high-level design input per requirement.
- Develop & execute manual test scenarios to ensure product quality.
- Execute sanity and regression suites.
- Report and track bugs
