

Turn complexity into vision

MR HealthTech Ltd, a Munich Re division, is one of the world's leading technology vendors to the Health Insurance industry. It provides state-of-the-art software platforms designed to support its customers end-to-end reliably and offer them solutions that help them address their business objectives while maximizing profitability potential. It currently operates in 19 countries, in 4 continents and supports 24 organizations.

Due to our increasing demand for designing and implementing best-of-breed software solutions, at our Athens Office, we are seeking specialists for the following position:

SOA Software Engineer

PROFILE

SOA Software Engineer will be responsible for the development, support, maintenance and implementation of complex workflow solutions using Oracle SOA Suite components (BPEL, BPM, ACM, OSB, Human Workflow and Business Rules).

Key Responsibilities:

- Work closely with dedicated teams of architects, business analysts, software engineers, testers and other employees to execute project plans.
- Analyze specifications and requirements for designing and implementing end-to-end SOA solutions with functional and technical components.
- Become members of an experienced development team that supports the development and testing of new and existing applications using Oracle Fusion Middleware.

Required Skills:

- University level degree (or higher education institute) in Computer Science, Information Technology or relevant field of study.
- 1 year of working experience in major vendor SOA products (One of Oracle's SOA/BPM Suite, IBM's Process Server, TIBCO's ActiveMatrix BusinessWorks).
- Knowledge of XQuery, XML, XSD and XSLT.
- Understanding of build and source control tools and processes.
- Fluency in English language.
- Experience with npm and Git.
- Good oral and written communication skills.
- Very good command of the English language.
