

Turn theory into practice

MR HealthTech Ltd, a Munich Re division, is one of the world's leading technology vendors to the Health Insurance industry. It provides state-of-the-art software platforms designed to support its customers end-to-end reliably and offer them solutions that help them address their business objectives while maximizing profitability potential. It currently operates in 19 countries, in 4 continents and supports 24 organizations.

Due to our increasing demand for designing and implementing best-of-breed software solutions, at our Athens Office, we are seeking specialists for the following position:

Technical Project Manager

PROFILE

The Technical Project Manager is responsible for overseeing the release life cycle developed by his/her assigned team, coordinates release deliverables across internal and external teams. He / She will be working closely with internal and external engineering teams.

WHAT YOU WILL DO

In order to bring projects to successful release, the Technical Project Manager will:

- Engage with engineering teams to plan their release scope in the context of the release plan
- Contribute to the continuous release planning process and deliverables and ensure adherence to guidelines and checklists
- Works with assigned Development Manager(s) on task assignments, and engineering escalations, project planning and prioritization
- Identify, communicate, and track risks to on-time and on-quality delivery
- Unblock teams when they encounter impediments
- Drive continuous improvement and change management around agile methodology
- Develop and maintain productive relationships with all internal stakeholders
- Collaborate with internal teams to drive prioritization, analysis and resolution of complex technical issues
- Coordinate all stakeholders (external vendors, partners, internal teams) involved in the implementation of assigned product development projects
- Maintain, monitor and report on assigned technology project progress, tasks, costs and resources

REQUIREMENTS

- 5+ years demonstrated success with projects in an enterprise software setting
- Experience in Project Management, complex operations and software development outsourcing
- Experience with Oracle technology and tools will be considered a strong asset
- Exposure to software development processes (as release manager, developer, project manager or product owner)
- Strong organizational skills and ability to handle multiple technology projects in parallel
- Ability to work closely and collaboratively with local and global teams.
- Scrum or other agile software development methodology
- Self-motivated, enthusiastic, positive, and the ultimate team player
- Strong personal organization skills including the ability to multi-task and prioritize job requirements
- Creative problem-solving approach and strong analytical skills

WE OFFER

- Competitive compensation
- Continuous training
- Enjoyable and stable working environment
- Leading-edge technology
