Our exclusive quotation, bordereau, and management information system allows you to manage your entire book of facultative property and casualty program business and track your exposures online.

AutoFac® Products

- Standard commercial umbrella
- Mini umbrella
- Excess and buffer for general liability and auto liability
- Property excess
- NATHAN Single Risk Assessment

Fast & Powerful

AutoFac gives you greater control over your facultative business. Because AutoFac is an Internetbased application, you can access it anywhere, anytime.

AutoFac's carefully designed user interface provides you with many built-in time-savers, including zip code search and verification, city look-up, drop-down boxes and calendar displays. A powerful search engine enables quick retrieval of information. For risks that fall outside the underwriting guidelines, a documented special acceptance workflow feature is available. You'll provide more responsive service to your customers by calculating premiums more quickly.

The Property Excess system provides:

- A rating engine that matches the terms of your reinsurance contract with Munich Reinsurance America, Inc.
- Multi-location risk support.
- Reporting and document capabilities, including monthly premium bordereaux, account profiles, policy transactions, renewal listings.
- A documented special acceptance workflow.

The Casualty Commercial Umbrella system provides:

- Multiple layer pricing with customized minimum premium settings.
- The support of individual state rates, with immediate updates.
- Reporting and document capabilities, including monthly premium bordereaux, account profiles, policy transactions, renewal listings, quote and binder letters, customized declaration pages, and schedules of underlying insurance.
- Pricing consistency, by using premium as the base and using the same risk features for each placement.
- A documented special acceptance workflow.

You're In The Driver's Seat

AutoFac includes many controls to give you greater control over your facultative business submission.

Your data can be submitted in three different ways:

1. Logon to the application and enter the data in the required fields.
2. Connect your underwriting system using XML web service and transfer data directly into AutoFac.
3. Link your Reinsurance Worksheet (Line sheet) directly to AutoFac and populate the data fields with the touch of a button eliminating double entry. The application will return your quote back into the same sheet.

Our IT organization and underwriters are ready to support the method of your choice.

Security Features

AutoFac resides in a highly secure Internet environment. User identification and password authentication adds greater security. With built-in controls, you can assign authority levels to several users of the system. You have the ability to maintain your own user list and to assign roles and responsibilities.

Access to NATHAN Single Risk Assessment

Munich Re's NATHAN (Natural Hazards Assessment Network) Risk Suite optimizes your assessment of natural hazard risks on an individual risk basis at the address level. AutoFac features a connection to the NATHAN Single Risk Assessment tool. By selecting NATHAN, you can evaluate your catastrophe exposure and receive instant feedback on your risk.

Addressing the key challenges of the future and working to devise cutting-edge solutions that render tomorrow's world insurable – that is what we have been doing in the U.S. property/casualty reinsurance market since 1917. Our recipe for success: we anticipate risks early on and deliver solutions tailored to your needs, creating opportunities for you to achieve sustained profitable growth.

Tailored Solutions: We know your market, its challenges, and untapped opportunities. Our solution-oriented approach means you can count on us to deliver custom products and responsive service.

Anticipating Future Risks: We provide access to a broad base of intellectual capital in underwriting, actuarial, claims, and many other specialized services to help your company better forecast, understand and manage its risks.

Sustained Profitable Growth: Our financial strength, broad risk appetite and comprehensive reinsurance products can help you to strengthen your market position and achieve sustained profitable growth.
