

ALLFINANZ Case Viewer Giving underwriters access to automated underwriting results

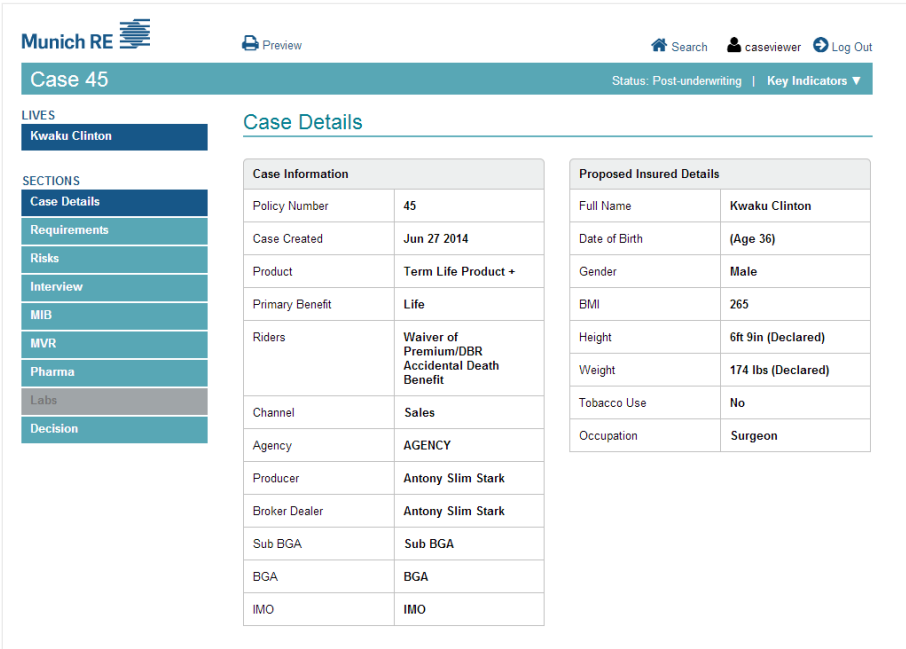

www.munichre.com/automation-solutions

Highlights

- Search for cases that have come through automated underwriting
- View all information collected from the automated underwriting process
- Increase the efficiency of your Underwriting Department
- Reduce system integration and maintenance costs
- Can be used to augment rather than replace existing manual underwriting systems

ALLFINANZ Case Viewer is an application that enables underwriters and other functions to search, view and print the details of a case that have come through the ALLFINANZ underwriting rules engine. Available information includes underwriting results, interview data and electronic evidence collected through ALLFINANZ Evidence Analyzer.

Case Viewer is an add-on module to the ALLFINANZ Interview Server. It is designed to improve the efficiency and effectiveness of the manual underwriting process and augment rather than replace existing systems used to support manual underwriting.

The screenshot shows the Munich RE Case Viewer interface. At the top, there is a navigation bar with the Munich RE logo, a 'Preview' button, and user information including 'Search', 'caseviewer', and 'Log Out'. Below this, the case title 'Case 45' is displayed along with its status 'Post-underwriting' and 'Key Indicators'. A sidebar on the left lists various sections: LIVES (Kwaku Clinton), Case Details (selected), Requirements, Risks, Interview, MIB, MVR, Pharma, Labs, and Decision. The main content area is titled 'Case Details' and is divided into two tables.

ALLFINANZ - Software Solutions for New Business Underwriting

www.munichre.com/automation-solutions
automatedunderwriting@munichre.com

Increased efficiency of your Underwriting Department

ALLFINANZ Case Viewer can directly increase underwriting department productivity and efficiency:

- Underwriters can make faster decisions as they can view and navigate through risks and evidence in one place
- Non-underwriting functions such as Claims can view evidence collected and the automated underwriting decision directly, reducing their dependency on the underwriting department
- ALLFINANZ Case Viewer provides print capability in PDF or paper form which can be used to communicate case information to external parties such as reinsurers

Reduced costs

ALLFINANZ Case Viewer can reduce customer project costs and risks by reducing the need to integrate Interview Server with existing systems in order to provide underwriters with access to automated results and interview data. Customers using Evidence Analyzer can also view evidence collected through the software.

Integrating ALLFINANZ Business Analytics with operational data

For ALLFINANZ Business Analytics customers who also purchase Case Viewer, users can navigate from the reports in Business Analytics to Case Viewer to access detailed information on a case.
